

Lê Thị Luyện

MANUAL QA TESTER / QA ENGINEER

Frontend Engineering Background · Functional · API · Database / Data Validation · AI-assisted QA

Email: leluyen89@gmail.com Phone: 086 522 4131 Date of birth: 12 Oct 1989 Location: Ho Chi Minh City, Vietnam Portfolio: luyenle.github.io/qa-portfolio

PROFESSIONAL SUMMARY

Manual QA Tester / QA Engineer with 2+ years of QA/QC experience and 8+ years of frontend engineering experience. I combine a tester's mindset with a hands-on understanding of UI, APIs, databases, data validation, debugging, and AI-assisted QA workflows. Comfortable across requirements analysis, test case and test scenario design, functional, negative, boundary, integration and regression testing, REST API testing with Postman, and SQL / database validation. I build reusable QA checklists and lightweight Python utilities, and use AI to accelerate test-case, test-data and test-flow generation while keeping human review in the loop. QA is my primary professional identity; the frontend background is an advantage for investigating defects from both the user-facing and technical sides.

CAREER EXPERIENCE

QA Engineer / Manual QA Tester — VHV 2026 – Present

Testing large-scale systems including Digital School Records ("Học bạ số"), national database systems, and K-12 online products.

- Analyse requirements and design test cases and test scenarios for core functional areas.
- Execute functional, negative, boundary, integration and regression testing; validate role and permission behaviour across user types.
- Perform REST API testing with Postman (GET / POST / PUT / DELETE), token-based authentication, and response / error-handling validation.
- Run SQL / database validation and data-integrity checks against expected results; apply information-security-oriented testing within project scope.
- Investigate, log and retest defects; collaborate closely with development and product teams.
- Maintain reusable QA checklists and Python QA utilities; use AI for test-case, test-data and test-flow generation with human review.

Manual Tester (Freelance / Project-based) 2025

- Requirement analysis and test case design for core product features.
- Functional, UI and regression testing; test-data design and edge-case testing.
- API testing with Postman (GET / POST, response validation); defect reporting and tracking with developers.
- Produced test cases, bug reports and test documentation.

Frontend Developer — Merkle (Isobar / Bluecom Vietnam — Dentsu Group) 2016 – 2024

- Built production web UIs (HTML, CSS / SCSS, JavaScript, React) for large client projects, including Salesforce Commerce Cloud.
- UI/UX analysis and pixel-accurate implementation against design; responsive layouts across devices and browsers.
- Frontend debugging and defect resolution; worked with REST APIs and request / response structures.
- Collaborated with QA / BA / Dev in Agile / Scrum and contributed to release-readiness checks.

Frontend Developer — Codespot 2015 – 2016

- Developed web interfaces with HTML, CSS and JavaScript; fixed UI defects and improved user experience.
- Worked with APIs and supported frontend integration.

Manual Tester / Manual QC — Codespot 2013 – 2015

E-commerce websites and products (sold on ThemeForest).

- Functional and UI testing; wrote and executed test cases.
- Detected and reported defects; retested after fixes and coordinated with developers.

KEY QA SKILLS

CORE

Manual Testing · Functional Testing · Regression Testing · Negative & Boundary Testing · Integration Testing · Test Case Design · Test Plan · Defect Reporting & Investigation · Retesting · Role / Permission Validation · UI/UX Validation

API & DATA

API Testing · Postman · REST API · HTTP Methods · Token-based Authentication · Database Testing · SQL · Data Validation · Data Integrity

PRODUCTIVITY

Python (QA utilities) · AI-assisted testcase / test-data / test-flow generation · Reusable QA checklists

QA PORTFOLIO / EVIDENCE

Detailed professional profile, career story and artifacts: <https://luyenle.github.io/qa-portfolio/>

- 6 QA productivity tools:** API Token Checker, QA Contrast Checker, Excel Data Cleaner, GomNhomTestCase, Excel Data Comparison, SRS → Testcase.
- 8 reusable QA checklist artifacts:** CRUD, Import Excel, Export Excel, Search / Filter / Sort, UI/UX, Security, SQL Data Validation, API Testing.
- AI-assisted QA workflow** with documented human-in-the-loop review.
- Sample QA artifact:** test cases, bug reports and API checks — [Google Sheets](#).

EDUCATION

Bachelor of Information Technology

University of Natural Sciences, Vietnam National University Ho Chi Minh City — 2013

TOOLS & PROCESS

Jira Azure DevOps TestRail Postman Git Chrome DevTools
Google Sheets

PROCESS

SDLC / STLC · Bug lifecycle · Requirements analysis · Agile / Scrum

TECHNICAL BACKGROUND

Frontend engineering (supporting): HTML · CSS · Responsive UI · JavaScript · React · Tailwind CSS · SCSS · Bootstrap · GSAP · Salesforce Commerce Cloud. Practical understanding of frontend / backend interaction and browser behaviour.

ADDITIONAL

Detail-oriented, especially with UI/UX defects · sees problems from both user and developer perspectives · responsible, patient, fast learner · works well independently and in a team · improving English communication · available immediately.
